

## Coda PC Data Scanner

Continuing in the tradition of CODA Products the NEW Australian made PC Scan tool is now available. Live data as well as specific functions tests are available on Australian, Japanese, Asian and some European vehicles. Engine and/or Transmission Modules, ABS, Body Control Modules, Instrument Cluster Modules, SRS, Audio Modules, Electronic Climate Control, Electronic Traction Control, Electronic Suspension, plus many other modules are available.

This small but powerful interface allows the direct connection of you own PC to the test vehicle's diagnostic data link without the need to purchase a scan tool. PC requires 233mhz or better processor, 9 pin serial port and Win98 or better operating system.

Package available with laptop included if required

Includes OBDII, Euro OBDII, Japanese, Asian & Australian vehicles

Constantly updated with software written in Australia by our own software technicians.

If you have purchased the original Coda Data Scanner, many of the vehicle interface leads may be updated to suit the new tool.

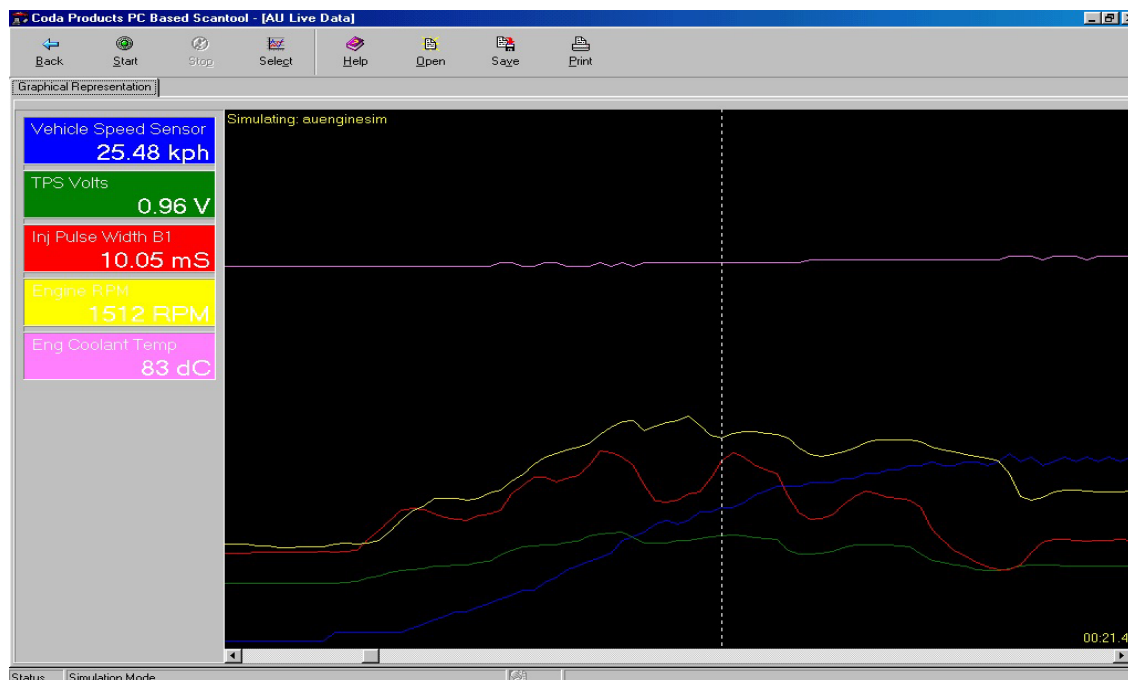

Large selection of early adaptors included as standard in kit

Owners of the original DOS version of this tool may return the old lead and software for credit towards the purchase of the new Windows based version.
